

Acknowledging the use of AI

I used Gemini (https://gemini.google.com/app?hl=en-AU) to help iterate on code, to help debug problems and to generate already known coding problems that I just didn't want to write by hand.

Some of this code was generated as a fast placeholder and has been deleted from the code base.

Code not written by me is how the trajectory line is drawn when throwing objects.

<https://github.com/nuckname/Beary-Scary-Museum-Heist/commit/e26b9c50424a1ce100e969c6c2efc735612bbc40>

Sometimes math is hard and complex AI helped with this:

<https://github.com/nuckname/Beary-Scary-Museum-Heist/commit/732e3429466edb1d71c00863539385585abf0cd4>

All comments done by an AI have an AI tagged at the start of the comment message alone with the shared link.

All AI generated code is also in each .cs file at the top.
